

Internet Categories That Can Be Blocked

Filters today have advanced tremendously, the leading filters work with category based filtering as well as with real time filtering. Real time filtering would automatically detect explicit content and block these sites. Choose the categories you want to remove access from.

Their tech support is available 24 hours a day 6 days a week. Their response time is generally within a minute. As religious Jews they understand our general lack of time, and necessity to get things done yesterday. When set up correctly, the filter runs in the background and is not even noticed. Think of a new air conditioner as an example, the first day you notice the sound, by the third day it is not noticeable at all.
